

CPSC 471 - Team Contract

Group T03-4:

- Braedon Haensel, 30144363
- Matias Lupick, 30216478
- Jolene Tan, 30301991

The following contact information will be used for each team member:

Name	Pronouns	Discord Username	Email
Braedon	He/Him	braedon7888	braedon.haensel@ucalgary.ca
Matias	He/Him	deadesttable	matias.lupick@ucalgary.ca
Jolene	She/Her	jolene_20278	jolene.tan1@ucalgary.ca

The team's Discord server will be used for all primary communications. Messages and group calls will be used as required, and communication must take place at least twice per week.

Members should respond to messages quickly, taking no more than 24 hours. Poor communication habits will be brought up within the team and may be noted in the team evaluations. A severe lack of communication will be strongly noted in the team evaluations for the corresponding members.

Work on the project will initially be divided voluntarily based on the interests of each team member. Work may be assigned directly to team members if necessary. Any unequal distribution of work will be noted in the team evaluations, including a clear account of the degree to which each member's contribution fell short of expectations.

There will not be any roles initially assigned to team members. Roles may be assigned at a later date as required and at the discretion of the team. This contract will be updated if any roles get assigned.

Frequent communication is strongly encouraged. In the event of a disagreement, all team members must clearly communicate their views and concerns and attempt to come to an agreement. If a disagreement between two members persists for more than 24 hours, the third member will determine the outcome. If a disagreement among all three members persists for more than 24 hours, the outcome will be determined by rolling a die

The use of generative AI is prohibited in all project work, and all submitted material must be the original work of the team.

The following major internal deadlines will be used:

- All work required for the Milestone Demo must be completed by Oct. 25th at 10:00pm. This includes a final review from each team member.
- All work required for the Final Demo must be completed by Nov. 29th at 10:00pm. This includes a final review from each team member.

In addition to these deadlines, further segmentation of the project will occur to establish smaller tasks as the project details and workload become clearer. This will be tracked using the team's Deadlines document, which lists each deadline along with its required tasks and dependencies. The deadlines and tasks within this document may be added to or amended as needed, with the consensus of the team. Failure to meet these deadlines may be noted in the team evaluations for each member, at the discretion of the evaluator.

This contract may be amended at any time with the consensus of its members. Each team member should review and reassess this contract on a biweekly basis.

Contract Signatures:

- I, Braedon Haensel, sign that I have read the entire contract and agree to the rules that have been established.

A handwritten signature in black ink, appearing to read "B Haensel". The signature is written in a cursive, slightly slanted style.

- I, Matias Lupick, sign that I have read the entire contract and agree to the rules that have been established.
